

Først må du installere en app for autentisering av 2 faktor. Du kan benytte «Microsoft Authenticator». Denne kan lastes ned fra App Store/Play Store for din telefon ved å søke den opp.

Android:

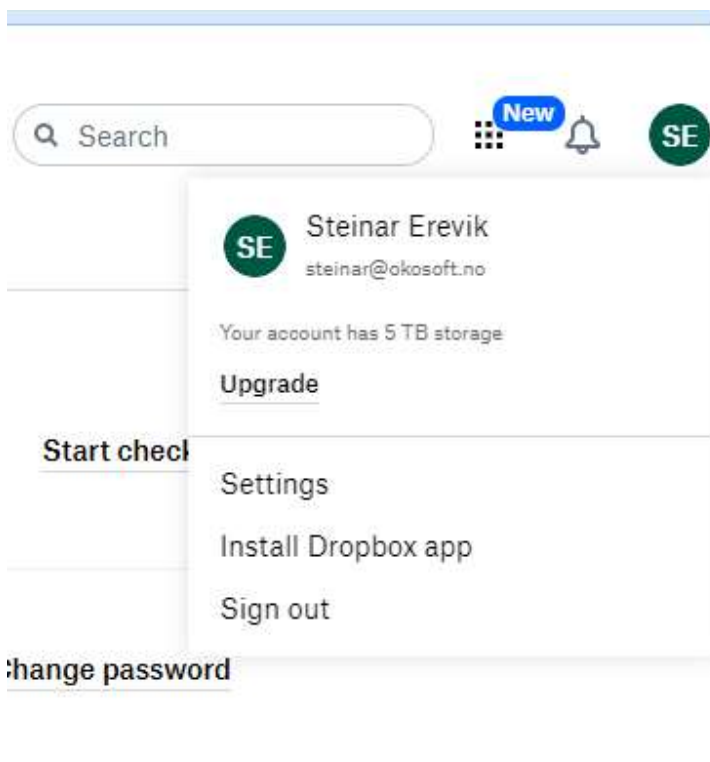

<https://play.google.com/store/apps/details?id=com.azure.authenticator&hl=no>

Iphone:

<https://apps.apple.com/us/app/microsoft-authenticator/id983156458>

For å aktivere 2-faktor på din Dropbox-konto må du gjøre følgende.

- Logg på <https://dropbox.com>
- Klikk på profilen din øverst i høyre hjørne.

- Velg Settings. Klikk deretter på fanen Security.

Security checkup

Take a minute to review your Dropbox security settings.
Never completed

[Start checkup](#)

Password

Set a unique password to protect your work Dropbox account.

[Change password](#)

Two-step verification

Require a security key or code in addition to your password.

Off

Klikk på knappen ved siden av Two-step verification for å starte prosessen. Klikk deretter på Get started i boksen som kommer til syne og skriv inn ditt passord.

Enable two-step verification

Two-step verification adds an extra layer of protection to your account. Whenever you sign in to the Dropbox website or link a new device, you'll need to enter both your password and also a security code sent to your mobile phone.

Velg: Use a mobil app

Her kan du velge «Use a mobile app» og klikk Next.

Enable two-step verification ×

How would you like to receive your security codes?

Use text messages
Security codes will be sent to your mobile phone

Use a mobile app
Security codes will be generated by an authenticator app

Next

Start opp Microsoft Authenticator og velg legg til ved hjelp av + oppe i Høyre hjørne.

Og velg Annen.

< Kontoer

HVA SLAGS KONTO LEGGER DU TIL?

Personlig konto

Jobb- eller skolekonto

Annen (Google, Facebook e.l.)

Skann QR koden med telefonen i app'en

Enable two-step verification

An authenticator app lets you generate security codes on your phone without needing to receive text messages. If you don't already have one, we support any of [these apps](#).

To configure your authenticator app:

- Add a new time-based token.
- Use your app to scan the barcode below, or enter your secret key manually.

Back

Next

Gå på kontoen i Microsoft Autenticator app-en og tast inn koden som vises og trykk Next.

Enable two-step verification ✕

Enter the security code generated by your mobile authenticator app to make sure it's configured correctly.

[Back](#) [Next](#)

Fyll inn ditt telefon nummer. Du kan også motta SMS med kode, om du ikke har tilgang på engangskoden i app.

Enable two-step verification ✕

Backup phone number (optional)

If you lose access to your primary security code source, we can send them to your backup mobile number instead.

While this step is optional, we encourage you to set up a backup phone number in case you lose your mobile phone or are otherwise unable to receive your security code.
